The New The Street Rod Harley Davidson: More Power and Aggressiveness The Street Rod Harley Davidson launches a new model based on its access model, the Street 750. In this way, which has a motor of greater power and a part of cycle completely revised with which it achieves a greater visual aggressiveness and also greater fun. The new Harley-Davidson Street Rod was born with the aim of offering the user three improved aspects regarding the Street 750: better maneuverability, improved performance and a more aggressive riding position. In addition, technical aspects such as propeller, geometry and part of cycle
